

SAURAV PANDEY

Full Stack Developer (PERN stack)

Kathmandu, Nepal | sauravpandey0325@gmail.com | [Portfolio](#) | [LinkedIn](#) | [Github](#) | +9779869751266

PERSONAL PROFILE

Full-Stack Developer with 2+ years of experience building and deploying scalable SaaS and marketplace products for UK-based users. Experienced in end-to-end product development including frontend, backend, AI systems, and cloud deployment using Next.js, Node.js, TypeScript, PostgreSQL, and AWS. Strong focus on performance, scalability, and building production-grade applications with real business impact.

WORK EXPERIENCE

CrowdBazaar Private Limited
Wembley, UK | Remote

Full Stack Developer
Feb 2024 – Present

[MigrantMinds](#) : A platform supporting UK Global Talent and Innovator Founder Visa applicants (UK)
Sep 2025 - Present

- Led end-to-end development of a scalable SaaS platform using Next.js, Node.js, TypeScript, and PostgreSQL, improving SEO, performance, and system reliability.
- Built an AI-powered applicant evaluation system analyzing user profiles via dynamic forms and large-scale web research to generate personalized UK visa roadmaps.
- Integrated 10+ AI APIs and implemented prompt engineering for document analysis, AI humanization, and visa assistance workflows.
- Developed a ChatGPT-powered assistant for UK endorsement queries, improving user guidance and engagement.
- Built a dynamic form engine that adapts questionnaires based on user profiles and documentation requirements.
- Developed a page-based document editor with 45+ templates using Tiptap for professional visa documentation.
- Implemented a credit-based system, full lead management pipeline, and admin dashboard to manage users and workflows.
- Integrated Stripe and Google Cloud APIs for payments, booking, and scheduling automation.

[TiffinBox](#) : A multi-vendor tiffin delivery marketplace serving Wembley and Harrow (UK)
Feb 2024 - Sep 2025

- Built and led development of a full-stack multi-vendor marketplace using Next.js, Node.js, TypeScript, and PostgreSQL for customers, vendors, and admins.
- Designed vendor onboarding, menu management, and order lifecycle system to streamline marketplace operations.
- Integrated Stripe for secure payments and subscription-based ordering flows.
- Implemented Google Cloud APIs for location, booking, and delivery workflows.
- Developed role-based dashboards for vendors and admins to manage orders, analytics, and customer activity.

Projects

- [CodeSync](#) – Built a real-time collaborative code editor using WebSockets and Monaco Editor, enabling multi-user live editing and secure JavaScript/TypeScript execution in a sandbox environment.
- [Devkit-Lite](#) – Developed and published an npm developer utility library providing automatic skeleton loaders, enhanced console logging, and reusable UI components to improve frontend development efficiency and UX consistency.
